Summary

Grade 9 student and open-source enthusiast focused on **Systems Programming and Linux Kernels**; a **Linux Kernel contributor** with hands-on experience in PCI-related debugging and hardware-level analysis. As the founder of **TATEN**, a collaborative student developer community, I lead technical initiatives across age groups. Recognized for **Academic Excellence**, I was awarded **Direct Admission** to senior high school (skipping the Zhongkao) based on a consistent Top 40 ranking and all-around performance.

Experience

Linux Kernel Bug Contributor Feb 2026

- **Issue Identification**: Identified and reported a PCI-related regression in the Linux kernel community.
- **Debugging**: Investigated kernel driver behavior via system logs; verified system configurations and collaborated with upstream maintainers for resolution.
- **Systems Knowledge**: Demonstrated deep understanding of low-level hardware-software interaction and kernel development workflows.

Founder & Lead Organizer, TATEN Community Jul 2025 - Present

- **Community Leadership**: Founded a technical community of 14+ members (ranging from middle school to undergraduates) to foster collaborative learning in CS.
- **Project Management**: Spearheaded the development of **TATEN OJ** and **AniDay**, coordinating version control and technical roadmaps.
- **Infrastructure**: Built and maintain the official portal (taten.org) and managed internal DevOps for community projects.

Projects

AniDay (HTML, CSS, JavaScript) aniday.xyz

A high-performance web application for querying anime character data. Optimized data retrieval logic and frontend responsiveness for a seamless user experience.

TATEN Online Judge (Vue, Rust) In Development

Designing a lightweight, containerized online judge system. Focus on secure code execution (sandboxing) and low-latency performance.

Student Computer Handbook (Markdown) In Progress

Authoring a comprehensive guide on modern computing for students, covering Linux basics, Git, and programming fundamentals.

Honors & Awards

2025 **First Prize**, 26th Jinan Student Information Literacy Activity — Municipal
Project: Algorithm and Data Visualization Toolset

2024 **Second Prize**, 25th Jinan Student Information Literacy Activity — Municipal
Project: Educational Game Collection

2023 **Municipal Outstanding Student**, Jinan Education Bureau — City-level
Selected from the top 0.9% of students for exemplary academic performance, moral character, and all-around comprehensive qualities.

2023 **Second Prize**, 24th Jinan Student Information Literacy Activity — Municipal
Project: Conway's Game of Life (Simulation)

Education

2025 – 2029 **Pingyin Experimental Senior High School**, Jinan, China

2023 – 2025 **Pingyin Experimental Senior High School (Junior Division)**

Skills

Systems & Low-level	Linux (Arch Linux), Kernel Debugging, Shell Scripting, Git, DevOps
Programming	C/C++, Python, Rust, Data Structures & Algorithms, JavaScript
Web Development	Vue.js, HTML5/CSS3, Frontend Performance Optimization
Multimedia Tools	Blender (3D Modeling), AE/PR (Video Synthesis), PS/AI (Visual Design)
